MONGEZ AI · FROM DATA TO DECISIONS

19 October 2026

TEST DATA – not actual customer results

First priority: 4 of 24 orders are recorded as returned (16.67%). Reconcile them with shipping and collection records and document the reasons.

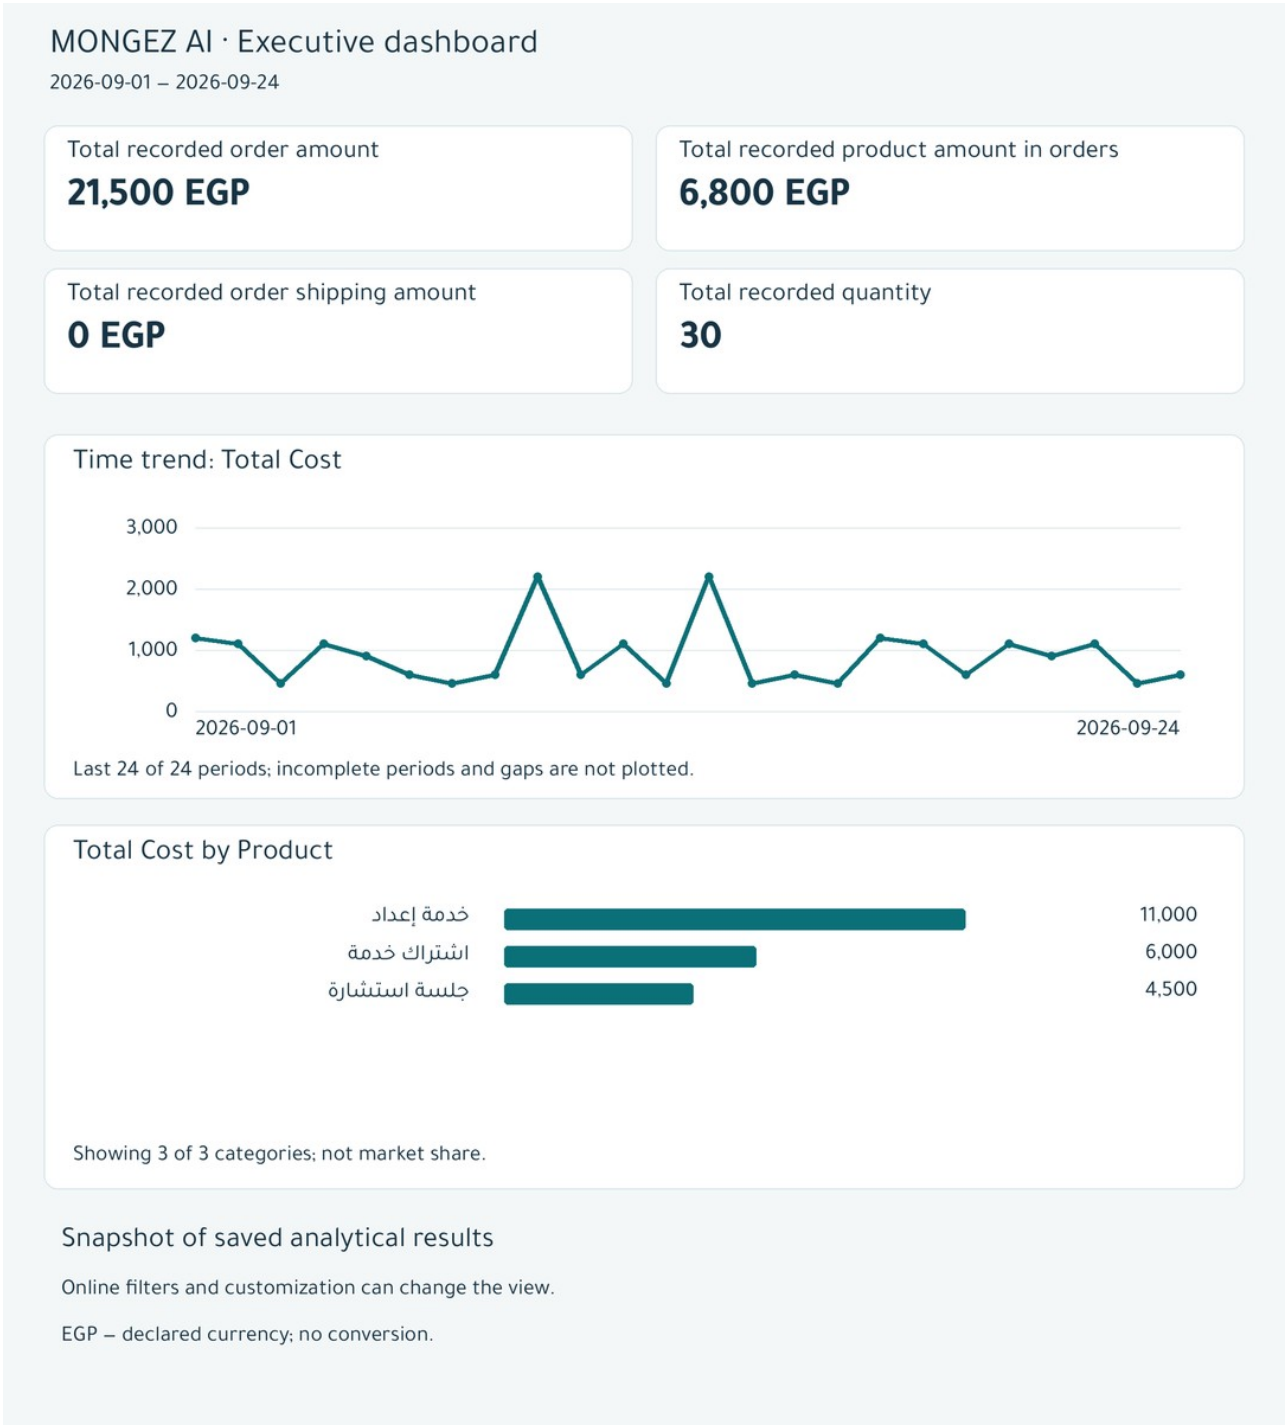
Amount reconciliation: 21,500 EGP – 6,800 EGP product amount – 0 EGP shipping = 14,700 EGP unexplained difference. Review field definitions, discounts and recording. The difference is not profit and no cause is inferred.

Recorded figures: Total recorded quantity: 30: Total recorded order amount: 21,500: Total recorded product amount in orders: 6,800: Total recorded order shipping amount: 0.

This three-page executive brief keeps detailed tables, exact values and method limits in the separate full report with appendix in Export Center.

| Total recorded order amount | Total recorded product amount in orders |
|---|---|
| 21,500 EGP | 6,800 EGP |

| Total recorded order shipping amount | Total recorded quantity |
|---|---|
| 0 EGP | 30 |



Scorecards, period comparison and categories from this report version; a static print dashboard.

At most three tasks; the client assigns owners. Timing is relative to receipt, not a commitment to execution.

Reading limits: comparisons describe observations, not causes. Unusual values require review, not automatic deletion. Recorded profit is not net profit without complete costs; order amounts do not establish collection. Declared currency: EGP

Automatically generated by MONGEZ AI. No human review is recorded; this report carries no personal signature or independent certification.

| Priority | Task and evidence | Follow-up from receipt | Status |
|---|---|---|---|
| High | Reconcile 4 returned records with the carrier | Within 48 hours | Proposed |
| Medium | Review 6 source records: 1, 5, 9, 13, 17, 21 | Within 7 days | Proposed |
| Medium | Compare Quantity by date in source records | Within 7 days | Proposed |
